Full Stack/UI Developer with 2.4 years of progressive experience including internship, primarily building intuitive and high-performance user interfaces using Angular and React, alongside backend development in Spring Boot and Node.js. Delivered solutions in Banking and Logistics domains involving UI modernization and REST API integration. Known for strong requirement analysis, efficient debugging, and developing clean, scalable components. Recognized as a Best Team Player for collaboration and ownership in cross-functional delivery.

Professional Experience

Trainee Programmer   Jul 2024 - Present

Kumaran Systems | Chennai
- Responsible for developing and modernizing enterprise applications with a key focus on scalable UI development, API integration, and backend services using Spring Boot and Node.js.
- Built and modernized web UIs using Angular and React, improving usability and navigation
- Migrated legacy Java Swing and Spring MVC modules to Angular and Spring Boot to improve maintainability.
- Developed backend APIs using Node.js and Spring Boot to support admin and operational workflows.
- Implemented Google Maps functionality and multiple UI screens in React Native for mobile usage.
- Integrated secure REST APIs with external systems, handling data using Oracle SQL.
- Participated in requirement analysis, debugging, and unit testing.
- Created UI prototypes and collaborated with designers using Figma.

Intern   Sep 2023 - Feb 2024

Kumaran Systems | Chennai
- Completed full-stack development training and built sample modules using Angular and Spring Boot.
- Developed Spring Boot APIs for attendance and internal workflows.
- Managed attendance and master data using Oracle SQL.
- Created API documentation using Swagger-UI to improve cross-team collaboration.
- Assisted in debugging and resolving production issues via log analysis.
- Participated in requirement understanding, testing, and sprint deliverables.
- Prepared Functional Design (FD) and System Design Documents (SDD) to support releases.
